

Tambov regional children's clinical hospital is a leading institution of regional health care, where all multi-specialized pediatric and obstetric and gynecological medical care is concentrated to the population of the region.

Residents and guests of our region can be sure that our specialists will provide highly qualified medical care to each patient, regardless of citizenship and place of residence. In an emergency or on a scheduled appointment, we are ready to provide a full range of services to restore and maintain the health of young patients from birth to 18 years, as well as expectant mothers.

The institution consists of outpatient and inpatient units, diagnostic units, pharmacy, auxiliary, paraclinical, economic and other services.

In the Advisory-diagnostic pediatric clinic daily you can consult the doctors in 20 specialties. Among them are candidates and doctors of medical Sciences, doctors of the highest qualification category. We made sure that the visit to the doctor was as comfortable as possible for the child. Friendly atmosphere avoids stress, and therefore creates conditions for informative and accurate diagnosis of the disease. If necessary, patients can undergo additional examination in diagnostic rooms: ultrasound, x-rays, CT, MRI, REG, ECG, as well as various laboratory studies.

The hospital of Tambov regional children's clinical hospital includes 10 clinical departments. At the disposal of doctors the latest high-tech equipment: anesthesia and respiratory systems, monitors tracking vital functions of patients, endovideosurgical equipment, urodynamic system, ENT harvesters, equipment for hydrosurgical and laser treatment of burns in children.

In the physiotherapy Department your child will be able to undergo treatment and rehabilitation procedures from massage to laser therapy. The unique methodology of Vojta therapy produces impressive results in the treatment of abnormalities of motor function.

Specialists of surgical departments successfully practice low-traumatic methods of surgical treatment. This reduces the period of rehabilitation of the patient and allows you to quickly return to an active life. Cervical adenotomy in ENT practice has become a popular and effective way to remove adenoids. The risk of complications is minimized.

For young patients created a cozy atmosphere in the wards of both General and individual stay.

Perinatal center. St. Martha of Tambov receives pregnant women and those who are just preparing for this important event. Here you can go through a full range of studies, on the basis of which the doctor will make a conclusion about your reproductive opportunities and possible risks. For accurate diagnosis at the disposal of our doctors laboratory of neonatal and biochemical screening, molecular cytogenetic studies and prenatal diagnosis. All the latest achievements of medicine in the field of obstetrics and neonatology are concentrated in our center. Here resuscitation, intensive care and the second stage of nursing are combined in one place. The baby can receive high-tech medical care, including deep prematurity.

Trust your health and the health of children to professionals !!!
